

Xtra Aerospace Standard Service Warranty Policy

XTRA Aerospace warrants all its workmanship and newly installed material to be free of defects.

Overhauled Units

Labor and newly installed components during the previous overhaul will be warranted for an interval of eighteen (18) months from the return to service date.

Repaired Units

Labor and newly installed components will be warranted for an interval of twelve (12) months from the return to service date. Coverage is limited to labor and parts replaced during the previous repair.

Liability

Liability under the terms of this Warranty Service Policy shall be limited to the parts replaced and associated labor during the previous shop service.

Xtra Aerospace will warrant the component or components that have been installed during the servicing of a unit during the warranty period.

Xtra Aerospace shall not be obligated for any defects if examination reveals that said defect is due to improper installation, removal, use, and mishandling, tampering and or improper storage after leaving our facility. If any warranty seals or stickers are removed or tampered with in any way, this warranty shall be voided.

Xtra Aerospace shall have no liability for the consequential or special damages including, but not limited to loss of use.

If you require further information regarding warranties, please do not hesitate to contact us.
